WHAT IS “URBAN STUDIES?”

The city is among the most fundamental of human institutions. Throughout history, cities have been sites of innovation in economic, political and cultural life. They have been centers of trade, seats of empire, and the locale of scientific, social, and artistic creativity. Increasingly, cities have also become key sites for understanding contemporary social life. In the 21st century the future is urban. Over half of the world's population (since 2007/08) now lives in cities that are often located in large urban regions in the global south. It is estimated that by 2050, two-thirds of the world's population will live in urban areas, resulting in a very different urban geography from that of the 20th century.

Often, as is the case in the Canadian context, urban regions are marked by significant social and cultural complexities. These include increasing levels of inequality, with striking contrasts of wealth and poverty, as well as a challenging array of planning, political, governance, and environmental concerns. These themes, from the scale of the global to that of the neighborhood, are the focus of York University's Urban Studies Program.

The program offers a framework for an undergraduate liberal arts education based in the study of modern metropolitan life in all its forms and of the social and spatial fabrics of the wide range of urban areas that exist. Drawing on the work of scholars and researchers who have explored the urban field from a range of perspectives in the social sciences and humanities, the program's courses encourage a critical appreciation both of the everyday life that we experience as city-dwellers today and of the modern city in historical and comparative context.

An important aspect of the Urban Studies Program is its strong emphasis on first-hand exploration of the city as a complement to classroom and library learning. The program's “core” courses include tutorial or small-group workshops focused on the practical crafts of urban research and on students' personal fieldwork projects. This generally involves students spending time immersed in one of the world's best-equipped urban laboratories, the Greater Toronto Area, as well as trips to other cities such as Buffalo and Montreal. Opportunities also exist through the iBA to travel to cities outside North America.

The program offers a good foundation for graduate study in such fields as urban planning, community development, municipal affairs, architecture, international development, and other social science disciplines, and for professions in such areas as education or journalism. Program graduates often pursue careers in urban planning or other areas of city government, in private sector urban design or urban development work, in agencies concerned with community development or environmental management, or in departments of the provincial and federal governments. Students may explore these possibilities in the program's 4000-level work-placement course. The program also has other skill and professional based courses to help students prepare for life beyond university.

Some of the many interests pursued by students in the Urban Studies Program are reflected in the research topics chosen by those in the program's senior seminar. These topics have included studies of Toronto communities such as Cabbagetown, Kensington Market and Woodbridge; the development of Toronto's downtown and of emerging suburban downtowns in North York, Mississauga and Vaughan; the ways in which deindustrialization and globalization have affected Toronto's waterfront and old industrial suburbs; planning and architecture in Toronto's Spadina district, Regent Park's public-housing neighbourhood, and in a major new suburban development in Markham; everyday life in Toronto's South Asian, Portuguese, Chinese and Italian communities; the SkyDome/Roger's Centre and the St. Clair Avenue streetcar line; and many other themes about people and places in the Toronto urban region.

Students with an interest in international studies may wish to pursue the International BA (iBA). The iBA is a unique option for students who recognize the value of a global perspective for their future career prospects and who desire an opportunity to experience daily life and study in urban contexts outside Canada. This option combines a strongly international program of studies at York and a requirement to develop or improve language skills, with a full term abroad at one of York's many exchange partner institutions.

CAREER PATHS

The real-life stories of Urban Studies Program graduates include those of many students who have used the program as a basis to pursue a career in the urban field. Various program alumni now work as urban planners, policy advisors, government and corporate administrators, researchers and research consultants, educators, real estate professionals, social workers, lawyers and in other professions for which their undergraduate studies served as a springboard.

Pursuing careers in fields of these kinds usually requires graduate studies beyond a BA. For example, many program alumni have enrolled in master's programs in urban planning at schools that have included York University, Queen's University, the University of Waterloo, the University of Toronto and the University of British Columbia, and have gone on to careers in planning or a related field in the public or private sector. Others have found careers through graduate programs in environmental studies, public administration and law. Still others have completed master's degrees in such academic fields as geography, sociology or political science, and fashioned careers on this foundation.

The Urban Studies Program is committed to offering a well-rounded undergraduate education in the liberal arts but also an education that may provide a solid path into the real world of modern urban life. Students who excel in their studies in the Urban Studies Program and are inclined toward a career in the urban field may be confident that the program will help open this opportunity for them.

PATHWAYS IN URBAN STUDIES

The Urban Studies Program has an introductory course at the 1000 level and is built around "core" courses at the 2000, 3000 and 4000 levels.

Core courses:

AP/SOSC 1733 6.0 World of Cities: Journeys Through Urban Space and Time
AP/SOSC 2710 6.0 City Lives and City Forms: An Introduction to Urban Studies
AP/SOSC 3701 3.0 Urban Analysis I
AP/SOSC 3701 3.0 Urban Analysis II: Research Project
AP/SOSC 4700 6.0 Urban Studies Seminar
AP/SOSC 4713 6.0 Seminar in Critical Urban Studies
AP/SOSC 4735 6.0 Seminar in Urban Theory

** Students are required to take one 4000 level core course*

Students then complete their required program credits based on their particular interests and objectives. The program is designed with three pathways that become open to students in their third and fourth year.

- A. Global Urbanism
- B. Urban Governance (Policy, Politics and Finance)
- C. Urban Community, Environment and Planning

While pursuing one of these three pathways is strongly recommended students can still select their courses based on their particular interests and objectives and in consultation with a program advisor.

A. Students interested in *Global Urbanism* are advised to select among:

3000 level courses

AP/SOSC 3714 3.0	Cities and Climate Change
AP/SOSC 3715 3.0	The Urban Professional

The iBA in Urban Studies also introduces students to language skills.

ADVISING

Advising in all years is now **compulsory**.

In Year One and Year Four advising with a faculty member in the program is compulsory. Students will be told of the advising periods and expected to make an appointment. Students must engage in advising in Year One to discuss their interests and to be directed towards the pathway that would most suit those interests. At the start of Year Three or Four, at the end of their degree, advising takes place to ensure that students are on the path to graduation and to discuss what they will do post-degree.

In Years Two and Three students advising with an Advisor in the Department of Social Sciences is compulsory. Again, students will be told of the Advising Days in which appointments can be made. Advising procedures will be advertised in class as well as through class list serves.

If students have specific questions about courses or paths, then they can also meet with the program coordinator. Students may also email urst@yorku.ca to arrange an appointment.

ENROLMENT IN URBAN STUDIES

Students may pursue urban studies in Honours Major, Specialized-Honours-major or 90-credit BA programs. Or they may combine urban studies with a second field in a double-major or major/minor arrangement — for example, geography, environmental studies, history or international development. The program also offers a Certificate. Requirements of these degree options are outlined below.

BA Program

The 90-credit BA major requires at least 30 credits in Urban Studies including:

- SOSC 1733 6.0
- SOSC 2710 6.0
- SOSC 3701 3.0 AND SOSC 3702 3.0

At least 12 credits drawn from SOSC 3711 3.0, SOSC 3712 3.0, SOSC 3714 3.0, SOSC 3715 3.0, SOSC 3717 3.0, SOSC 3718 3.0, SOSC 3720 3.0, SOSC 3742 3.0, SOSC 3746 3.0, SOSC 3745 3.0, SOSC 3755 3.0, SOSC 3760 6.0, SOSC 3770 3.0

Honours BA Program

The Honours BA requires at least 42 credits in Urban Studies including:

- SOSC 1733 6.0
- SOSC 2710 6.0
- SOSC 3701 3.0 AND SOSC 3702 3.0
- SOSC 4700 6.0, SOSC 4713 6.00, OR SOSC 4735 6.0
- At least 18 further credits from the Urban Studies Program list of courses including at least 6 credits at the 3000 level and 6 credits at the 4000 level.

Specialized Honours BA Program

The specialized Honours BA requires at least 54 credits in Urban Studies including:

- SOSC 1733 6.0
- SOSC 2710 6.0
- SOSC 3701 3.0 AND SOSC 3702 3.0
- SOSC 4700 6.0, SOSC 4713 6.00, OR SOSC 4735 6.0

- At least 30 credits from the Urban Studies Program list of courses including at least 12 credits at the 3000 level and 12 credits at the 4000 level

Honours iBA Program

Students will take at least 42 credits in urban studies including the following:

- SOSC 1733 6.0
- SOSC 2710 6.0
- SOSC 3701 3.0 AND SOSC 3702 3.0
- At least 12 further credits chosen from the urban studies list of courses, including at least six credits at the 3000 or 4000 level
- SOSC 4700 6.0, SOSC 4713 6.00, or SOSC 4735 6.0
- At least 6 further credits at the 4000-level chosen from the list of urban studies courses.

In addition to the courses required for the major, students in the Honours iBA program must fulfill the following requirements:

- At least 18 credits in a modern language offered by York University, including the Advanced 1 university-level course in the chosen language;
- At least 12 credits of internationally-oriented courses chosen outside the major. These could include at least one full term abroad as a full-time student at one of York University's exchange partners.
- EN 3592 6.0 Literary London
- ARTH 2800B/ARTH 3800B (6.0) Studies Abroad: The Arts in Culture I/II Rome: Open City

For more detailed information regarding the Honours iBA program requirements, please consult the Faculty of Liberal Arts & Professional Studies Degree Requirements section of the Undergraduate Calendar. The requirements for the Honours iBA Program in Urban Studies will be included in the Urban Studies section of the Undergraduate Calendar. The Honours iBA program in Urban Studies may be pursued jointly with any Honours Minor BA program in the Faculty of LA&PS.

Honours (Double-Major) BA Program

The 42-credit Honours BA in Urban Studies may be pursued jointly with any other Honours BA program in the Faculties of Liberal Arts & Professional Studies, Environmental Studies or School of Art, Media, Performance & Design, or with certain majors in the Faculty of Pure and Applied Science.

Honours (Double-Major) Interdisciplinary BA Program

Urban Studies may be linked with another Honours double-major interdisciplinary BA program in the Faculty of Liberal Arts & Professional Studies. Students will complete at least 36 credits in each of the Urban Studies Program and the second program (including at least 18 credits at the 4000-level with at least 6 credits in each program). Further details about double-major requirements in the various interdisciplinary programs are available at the program offices. In Urban Studies, the 36 credits will include:

- SOSC 1733 6.0
- SOSC 2710 6.0
- SOSC 3701 3.0 AND SOSC 3702 3.0
- SOSC 4700 6.0, SOSC 4713 6.00, OR SOSC 4735 6.0
- at least 12 further credits from the Urban Studies Program list of courses.

Honours (Major/Minor) BA Program

The 42-credit Honours BA in Urban Studies may be pursued jointly with any Honours Minor BA program in the Faculties of Liberal Arts & Professional Studies, Environmental Studies or School of Art, Media, Performance & Design, or with certain minors in the Faculty of Pure and Applied Science.

Honours (Minor) Program

An Honours Minor in Urban Studies may be pursued jointly with an Honours Major BA program in the Faculties of Liberal Arts & Professional Studies, Environmental Studies or School of Art, Media, Performance & Design, or with certain majors in the Faculty of Pure and Applied Science. The Honours Minor requires at least 30 Urban Studies credits including:

- SOSC 1733 6.0
- SOSC 2710 6.0
- SOSC 3701 3.0 AND SOSC 3702 3.0
- SOSC 4700 6.0, SOSC 4713 6.00, OR SOSC 4735 6.0
- 6 additional credits from the Urban Studies Program list of courses at the 3000 or 4000 level.

CERTIFICATE IN URBAN STUDIES

A Certificate in Urban Studies may be pursued by any non-Urban Studies major in an undergraduate program and requires at least 24 credits including:

- SOSC 1733 6.0
- SOSC 2710 6.0
- 12 further credits from the Urban Studies Program list of courses including at least 6 credits are the 4000 level.

In connection with these requirements please note:

- Requirements listed are those of the Urban Studies Program; students should also consult Faculty of LA&PS requirements for the particular degree option they pursue.
- In cases where a student pursues two fields in a double-major or major/minor program, a course listed as an option in both fields may count toward credit in only one field.
- 9-credit 1000- and 2000-level “general education” courses listed as program options count as 9 credits toward a student’s overall total of 120 credits, of which 6 credits count towards a major or minor in the program.

STUDENT ACTIVITIES

Federation of Urban Studies Students (FUSS)

In many years, students in the Urban Studies Program have activated the Federation of Urban Studies Students (FUSS), an association founded to represent student interests in the program. FUSS's work in past has included bringing guest speakers to York, making a video, arranging urban-studies field trips and organizing information sessions about possibilities for urban careers or for graduate studies. Support from the Urban Studies Program is available for FUSS activities or for any other program-related events that students may want to sponsor. Students interested in exploring these possibilities should consult the program coordinator.

Website: <http://www.yorkfuss.wordpress.com>

You can also find FUSS on Facebook. Look for “The Federation of Urban Studies Students – York University”. FUSS also has space in the City Institute on the 7th floor of the Kaneff Tower. You can contact them at city@yorku.ca.

AWARDS / PRIZES / SCHOLARSHIPS

Urban Studies Program Awards

The Urban Studies Program has four yearly \$250 awards.

Two are *Marion Miller awards* named for a program student who died in the 1978 Cranbrook airplane accident. The Miller awards have three criteria. A student must be an Urban Studies Program major, have a good academic record, and have a record of good citizenship within the program or within York

more widely.

The awards are endowed by Ms. Miller's family and are given to: a student completing his/her 3000-level work in the program a student completing his/her 4000-level work in the program The program also offers:

- The ***Frances Frisken Prize***, named for a now retired faculty member, who was strongly committed to undergraduate education. This prize is awarded to the Urban Studies Program major with the highest numeric grade in SOSC 2710 (with ties settled by overall GPA that year).
- The ***Urban Analysis Prize***, awarded to the Urban Studies Program major with the highest numeric grade in SOSC 3700 (with ties settled by overall GPA that year and with the prize devolving to the student with the second-highest grade if the student with the highest grade receives the 3000-level Miller award).

The Urban Studies Program has one yearly \$5000 award:

- ***The Sgro Academic Leadership Entrance Award (formerly known as the Christina L. Sgro Entrance Award)***: The Sgro Academic Leadership Entrance Award has been established in honour of Franco and Rosa Sgro, models of integrity, honour and excellence and true inspirations to their children. The award will be given annually to an undergraduate student accepted into the Faculty of Liberal Arts and Professional Studies, or the Faculty of Environmental Studies, who intends to focus on Geography, and/or Urban Studies/Planning. To be eligible applicants must demonstrate financial need, possess a minimum grade point average of 7.00 (B+) and a proven history of community leadership centred on improving and strengthening their home communities. Applicants must also submit a statement describing their interest in the field of Geography or Urban studies/Planning.
Revised Award Value: \$5,000 (formerly \$500).

The Urban Studies program also has one \$1000 award every other year (shared with the Geography Department):

- The ***Mohamed Naim Malik Scholarship*** will be awarded to a full-time undergraduate student enrolled in the Faculty of Liberal Arts and Professional Studies in their 3rd or 4th year of study who demonstrates academic excellence (7.50 GPA). To be eligible students must submit a one-page statement outlining their involvement/leadership in student life or with their local neighbourhood and discuss how their research or academic focus includes social or cultural diversity/inclusion. Mohammed Naim Malik was a tireless community leader and volunteer, whose impact is still felt in the communities he served. The goal of ensuring inclusivity is what motivated his community involvement. Through his leadership, he worked diligently to remove social and cultural barriers and celebrate diversity. Adjudication of the award will rotate between a student enrolled in Urban Studies and a student enrolled in Geography. The value of the award is **\$1000**, and the funds will be applied to the student account at the University.

Department of Social Science and Faculty of Liberal Arts & Professional Studies Awards

Six Department of Social Science and Faculty of LA&PS Awards may also be of interest to Urban Studies Program students:

- ***Social Science Bursary.*** This annual prize of approximately \$800 is awarded to a student majoring in one of the Department of Social Science interdisciplinary programs who has completed between 30 and 60 credits with a GPA of 6.0 or higher, is currently registered in a minimum of 18 credits, is a Canadian citizen or permanent resident and an Ontario resident, and demonstrates financial need. The Office of Student Financial Services selects the recipient in fall. For further information please contact the Department of Social Science.
- ***Ellen Baar Award.*** This annual award of approximately \$1250 honours the memory of Professor Ellen Baar, a member in the Department of Social Science strongly committed to interdisciplinary teaching. It is awarded to the student entering his/her final year as a major in a Department interdisciplinary program who received the highest GPA in his/her third year of studies, will have completed two Department of Social Science courses in their program, and demonstrates financial need. (If the student with the highest GPA does not demonstrate financial need, a transcript notation will record his/her achievement, and the funds will be distributed to the next-highest student who meets the criteria.) There is no application process; the successful student will be notified by the Chair of the Department of Social Science.
- ***The Otto Friedman Memorial Scholarship.*** This annual prize of approximately \$500 is awarded to a student entering fourth year who has a strong interest in social theory, social policy and planning or in the role of the arts in society; has a GPA of 6.0 or higher; and has a record of service within the York community. Applications may be obtained at the office of the Chair, Department of Social Science.
- ***Lillian Lerman Book Prize.*** This \$50 award honours Lillian Lerman, a member of the Department who retired in 1991, in recognition of her dedication and contribution to undergraduate teaching. It is awarded to the student writing the most outstanding essay in a 1000-level Social Science course. Nominations are made by course directors. For further information please contact the Department of Social Science.
- ***Gordon Lowther Award.*** This annual prize of approximately \$700 is awarded to the student entering second year and enrolling in a Department interdisciplinary program who achieved the highest GPA in his/her first year. The student must be currently registered in a minimum of 18 credits, be a Canadian citizen or permanent resident and an Ontario resident, and demonstrate financial need. Applications may be obtained at the office of the Chair, Department of Social Science.
- ***Faculty of LA&PS Essay Prizes.*** Faculty of Liberal Arts & Professional Studies essay prizes are awarded annually to four students in the Faculty. One at each of the 1000, 2000, 3000 and 4000 levels, judged to have written the most outstanding essays at their levels. There are also four honourable-mention prizes, and all essays appear in the Faculty of LA&PS yearly publication, *Prize Winning Essays*. The value of the prizes is \$300 and \$100 for honourable mentions. Essays are nominated by professors.

FACULTY OF LIBERAL ARTS & PROFESSIONAL STUDIES

New General Education Guiding Principles

All General Education courses are offered at the 1000-level. All approved General Education courses may count for General Education credit; some may count for major credit; **none may count as both**. All LA&PS students will be required to take a minimum of **21** General Education credits from the approved list of LA&PS General Education courses.

It is strongly recommended that students successfully complete (pass) their first General Education course within **their first 24 credits** and all General Education courses within **their first 48 credits**.

General Education Model

To fulfill the Liberal Arts & Professional Studies General Education requirements students must take 21 credits of General Education including:

- 6.00 credits in Natural Science (NATS).
- A 9.00 credit General Education-designated course in Social Science (SOSC) or Humanities (HUMA) categories.
- A 6.00 credit General Education-designated course in the opposite category to the 9.00 credit course in SOSC or HUMA already taken.

Students already enrolled prior to 2014 will be permitted to continue in their existing degrees and programs of study following grand-parented rules. Current students of the Faculty of Liberal Arts & Professional Studies who change their degree and programs as of Fall/Winter 2014-2015 will be required to follow the new General Education rules. Students beginning their studies in September 2014 and on will follow the model outlined above.

THE HONOURS BA DEGREE

Honours BA: 120 Credits

Residency requirement: a minimum of 30 course credits and at least half (50 per cent) of the course credits required in each undergraduate degree program major/minor must be taken at York University.

Graduation requirement: students must successfully complete (pass) at least 120 credits which meet the Faculty's degree and program requirements with a cumulative grade point average off at least 5.00.

General Education: a minimum of 21 General Education credits (listed above).

Major credits: students will take at least 42 credits in Urban Studies including the following:

WORLD OF CITIES: JOURNEYS THROUGH URBAN SPACE AND TIME

Course Director: Prof. Jeffrey Squire

This course considers our contemporary urban and urbanizing world. For the first time in history, more than half the world's population lives in cities. How has this happened? What's going on in these cities? What do cities in different parts of the world have in common? Why are they different? Students are introduced to cities around the world through images, films, and stories, as well as scholarly texts, and are encouraged to think about the ways in which different cities and their unique urban cultures produce different everyday life experiences.

The course introduces some of the questions that underlie the field of the Urban Studies - what makes cities a different kind of human settlement? - and offers an historical overview of the development of cities into the mega urban regions that are a particular feature of the contemporary urban world. We explore urban issues and their spatial expression such as poverty and inequality, urban communities, migration, municipal governance and civil society, urban networks and globalization, downtowns and suburbs, nature and cities, urban icons, the role of the city in art, cities and consumption, urban environments, and so on.

Format: One two-hour lecture and one one-hour tutorial weekly

Projected Enrollment: 150

This course cannot count as a General Education course for URST majors/minors

CITY LIVES AND CITY FORMS: AN INTRODUCTION TO URBAN STUDIES

Course Director: TBA

The course introduces the tradition and practice of urban study and considers ways that the city is both shaped by and shapes the culture, politics and economy of contemporary society and everyday life. Its themes include the history of urban study, the diversity of Canada's urban populations, the development of the city's physical fabric and spatial patterns, the place of Canadian cities in global society, the practice of urban fieldwork, and contemporary urban issues and dilemmas.

Format: One two-hour lecture and one one-hour tutorial weekly

Projected Enrollment: 75

Prerequisite: AP/SOSC 1733 6.0

AP/SOSC 3701 3.0
URBAN ANALYSIS I

Course Director: Prof. Teresa Abbruzzese

The aim of this course is to equip students with the knowledge to conduct research and develop a research proposal. The course introduces students to the practice of urban research, exploring theoretical assumptions, research ethics and methods, both quantitative and qualitative. The course has two segments, both analogous to the phases of the pre-field research process: (1) a discussion of theoretical approaches to urban analysis and how these views the city differently, as well as an exploration of research ethics; (2) an exploration of different research methods. The course includes a compulsory three-day field trip to Montreal in which students visit a variety of neighbourhoods and institutions, and meet with other students, teachers, community groups and policy makers.

Prerequisite: SOSC 2710 or permission of the instructor

Course Credit Exclusion: AP/SOSC 3700

Format: Three seminar hours weekly

Projected Enrollment: 35

AP/SOSC 3702 3.0
URBAN ANALYSIS II: RESEARCH PROJECT

Course Director: Prof. Teresa Abbruzzese

The aim of this course is to equip students with the knowledge to conduct research. Students conduct their own original research. The course introduces students to the practice of urban research, data analysis, both quantitative and qualitative, and writing up research results to produce a research report. The course has two segments, analogous to the phases of the research process: (1) field work, in which students collect their own data (2) post field work in which students explore techniques of research analysis and analyze their own data. The course concludes with students presenting their research results.

URBAN STUDIES SEMINAR

Course Director: Prof. Douglas Young

SOSC 4700 is a capstone course in the Urban Studies Program, providing a framework for senior students to pursue fieldwork projects about topics of scholarly and personal interest. As well, the course may accommodate students in fields related to Urban Studies who wish to join the seminar to do a sustained urban fieldwork project. For those ending their schoolwork this year, the course is a final opportunity for self-directed urban research. For those who will continue their studies, it is a bridge from undergraduate work to the independent research that is a cornerstone of the graduate and professional programs. The course builds on the Urban Studies Program's 2000- and 3000-level core courses as well as on class members' work in other urban-related courses. In framing and carrying out their projects, students will draw on material encountered in another course and on the store of urban

knowledge they have developed. To provide common ground for the seminar, the projects share the same framework as case studies of social, spatial, historical, cultural, economic or political features of a specific community or place in Toronto.

Format: Three seminar hours weekly

Prerequisite: AP/SOSC 3700 6.0, OR AP/SOSC 3701 3.0 AND AP/SOSC 3702 3.0 and completion of 84 credits, or permission of the instructor

SEMINAR IN CRITICAL URBAN STUDIES

This course offers students an intensive blend of urban theory and research practice. Students engage with classic and current debates in Urban Studies in a seminar format, and conceptualize, research, and analyze urban sites and phenomena in a workshop format. Classes alternate between seminars in which students discuss key texts in Urban Studies, and workshops in which student's present work-in-progress for peer feedback and critique. Over the year, students select an urban site, phenomena, or set of documentary materials as the subject of an individual research project. A series of sequential assignments leads to a final, analytic paper firmly situated within the Urban Studies literature based upon the student's own research.

This course builds on the program's 1000, 2000, and 3000 level core courses in which students have been introduced to key concepts and theories in Urban Studies, have been introduced to a range of urban research methodologies, and have conducted their own empirical research. This course is a capstone course for majors in Urban Studies.

Prerequisite: AP/SOSC 3701 and AP/SOSC 3702, and completion of 84 credits, or permission of the instructor.

Course Credit Exclusion: AP/SOSC 4700, AP/SOSC 4735

SEMINAR IN URBAN THEORY

Course Director: Prof. Jeffrey Squire

The Seminar in Urban Theory is another capstone option for the Urban Studies Program. This course studies the development of urban theory from the 19th and into the 21st century. In it, we examine the main theorists in urban studies and analyze how they seek to describe and explain the city, its functions and forms, and the experience of urban life.

Prerequisite: 90 credits completed. Open to Urban Studies, Geography, and FES Students; other students by permission of instructor.

Students are required to take one 4000 level core course. They may (but are not required to) take both SOSC 4700 6.0, and 4735 6.0. Note; if students take SOSC 4713 6.0, they cannot also take SOSC 4700 6.0 or SOSC 4735 6.0

CYBERCITIES: COMMUNITY AND COMMUNICATION IN CHANGING URBAN AREAS

Technology's impact on cities is examined, with an emphasis on institutions and landscapes. Changes of metropolitan form, issues of community formation, and emerging patterns of work, leisure and urban life are explored in the context of shifting modes of electronic communication. Sections of the course include: urban infrastructure and technology; the city as a communications nexus; the changing role of urban institutions; changing spatial organization and urban form; there goes the neighbourhood! (community and neighbourhood formation in the information age); effects on individuals at work, school, play and home and in respect to privacy and access to information; the politics of technology (what is happening to national boundaries?); what's next? (speculations about the future of cities). Students must be familiar with the use of browsers (e.g. Netscape or Internet Explorer) and e-mail. Registered students must activate their York University e-mail accounts before the start of class. (Please note that only 6 credits from this course count toward Urban Studies Program credits; these 6 and the remaining 3 credits may also count as general-education requirement credits.)

THE CULTURE OF CITIES

From Ur in 3000 BCE to the colonnades of the Greek agora, from Roman baths to the cathedral towns of Medieval Europe, from the squalid industrial cities of Victorian England to the post-industrial cities of today, the city has remained an enduring symbol of human culture. Throughout this course we will be exploring the culture of cities over the last five millennia using a variety of visual images, videos, case studies of world cities and a classic text – *The City in History* – written by Lewis Mumford, one of the most important twentieth-century scholars in the study of cities.

Online Format. This course is delivered through the Internet. There are no face-to-face meetings. Instead of coming to the York University campus for lectures and tutorials, you will access online lectures, online videos and other materials from wherever you have internet access. Quizzes and assignments will be submitted online. You will use the Internet to connect with tutorial classmates and to discuss course materials with the Course Director and your Teaching Assistant.

CITIES AND CLIMATE CHANGE

Course Director: TBA

Cities face many challenges, but climate change presents some of the most urgent demands on governance, policy, and planning that cities have ever experienced. Inequalities are heightened in crises and are often determinative of success or failure in survival. We examine the concept of resilience which is much-touted in academic and popular literature as the desired goal of urban climate policy, consider the issue of urban social justice, and critique how cities can and do pursue resilience in a context of climate uncertainty. The course presents and discusses a range of concepts, theories, and issues relevant to and important to understanding the challenge of climate change for cities. We explore how cities are responding to climate change impacts and forecasts, and how urban scholars assess these responses. We discuss the varied and competing ideas of resilience as a response to climate change and their varied frameworks for assessing and developing resilience. We consider social justice issues inherent in climate change, and review governance and policy approaches. Students in the course address real-world problems through research and prepare dossiers on assigned cities, working in groups, and present their work-in-progress for class discussion and feedback. The city dossiers include a background report on the city's climate scenario, an assessment of existing climate-related policies, a summary of key urban climate resilience issues and propose a climate resilience development strategy tailored to the city.

THE URBAN PROFESSIONAL

Course Director: Prof. Teresa Abbruzzese

This course focuses on professional development with emphasis on professionalism, networking, ethical awareness, work-life balance and broadening the students' skillset to make an effective transition from academia to a career in the urban field. The course helps students develop both hard skills such as technical writing and soft skills such as communication, problem solving, and time management. The course provides students a general overview of key aspects of the urban professional's work such as ethics, keeping up with the literature, evidence-based policy making, etc. Classes consist of a blend of seminars, workshops, and in-class training sessions that provide students the opportunity to gain more hands-on skills to complement their academic knowledge and training in producing research and analytical papers. The course not only prepares students for the fourth-year experiential placement course in the program, but also gives students a head start in choosing a career path upon graduation. Students have the opportunity to explore future career paths in the urban field and the different roles of the urban professional between the public, private, or non-profit sectors. The

course seeks to develop students' ability to effectively network, search, apply, and interview for jobs, and build their professional skills to strengthen their resumes and improve their employability prospects. Students in the course benefit from a range of teaching expertise and skills from faculty and practitioners, including alumnae of the program. Assignments in the course consist of written and experiential exercises to facilitate students' professional development combining skills training and networking strategies.

URBAN TRANSPORTATION: AN INTRODUCTION TO CRITICAL ISSUES

Course Director: Prof. Douglas Young

Transportation issues are often at the forefront of urban political battles as different groups in society vie to have their mobility needs satisfied. Drawing on case studies from around the world, this course considers the links between urban transportation and the quality of everyday life, and the essential role of transportation in urban economic processes. The course explores the uneven provision of, and access to, systems of urban transportation building on the work of Graham and Marvin (2001) and what they call "splintering urbanism." They document how, in an age of neoliberal urbanization, urban regions 'splinter' into highly networked spaces connected by premium transport infrastructure and other zones of poorly connected spaces. Topics in the course are intended to provide students with an introduction to a critical and interdisciplinary understanding of issues in urban transportation. They may include mobility and everyday life, transportation equity and social justice, public vs private modes of transportation, gender and mobility, urban built form and public health, active modes of transportation, transportation and the price of housing, and the transportation needs of urban economies. An off-campus session of the course is organized as a tour of a Toronto neighbourhood chosen to demonstrate the complexity of urban transportation issues.

INTRODUCTION TO URBAN DESIGN

Course Director: Prof. Douglas Young

The course explores Urban Design as the intentional shaping of urban space. It questions the assumption that Urban Design is a purely aesthetic exercise and considers it instead to be a realm of city-building that is always political, social, cultural, economic and environmental. Urban Design is explored as a process that intentionally represents cultural values and social organization and that bridges architecture, urban planning and landscape architecture. The politics of Urban Design are explored by posing the question who designs for whom?

Topics may include a historical review of key periods of urban design in the 20th century, urban design and post-suburbia, urban design and sustainability, socialist and post-socialist cities, and the challenges of living in the 21st century with the legacies of 20th century urban design. Case studies from urban regions around the world are critically examined.

MAPPING THE CITY

Course Director: Prof. Teresa Abbruzzese

How is the city visually known? Visual representations can tell us much about urban places that traditional social science modes of analysis fail to communicate about socio-spatial relations. The aim of this course is to critically understand maps as visual communication instruments and as social constructions of reality anchored in practices and systems of power. In this course we go beyond normative models of cartography that necessitates thinking about maps as tools to delineate territories but as representations produced in specific cultural, political, and historical contexts. This course explores conceptual issues of representation, meaning, and the various ways of formally and informally representing the city, including historical and contemporary map-making, exploring spatial technologies from GIS to graffiti. Students will engage with alternative mapping exercises that seek to dismantle cartographic practices that reinforce hegemonic power structures and ways of thinking, such as counter-maps, participatory mapping, feeling maps, and using mobile devices to document urban practices and provide new insights on socio-spatial relations in the digital age.

COMPARATIVE URBAN DEVELOPMENT: POSTCOLONIAL URBANISM

This course explores the social and spatial fabrics of former colonial cities such as Jakarta, Sao Paulo, and Morocco. The shaping and experience of postcolonial cities is addressed through issues such as colonialism, nationalism, migration, and globalization. Class time emphasizes discussion; materials include readings and films. Students enrolled in the course as an area-studies program option are required to do their major project within the area of specialization of their program.

ASIAN CITIES IN CONTEXT

The course considers themes in postcolonial urbanism with reference to a number of East and Southeast Asian cities, including Jakarta, Hong Kong, Taipei, Seoul, Shanghai, and Bangkok, and addresses the primary issues confronting postcolonial cities, with an emphasis on reading the city and examining the experience of urban life. The course begins by outlining some major theoretical issues – including identity, tradition/modernity, nationalism, citizenship, exclusion, and heritage – which underlie the discussion of postcolonial cities and which emphasize the experience of the postcolonial city as a space of encounters, difference, negotiation and visual expression. The class then examines the origins of Asian urban forms and the urban settlements of colonialism and considers the urban architecture of

colonialism for the ways in which colonial planners sought to inscribe the power of the metropole in the cities of the colonies. What legacy did this architecture leave for the planners and governors and residents of post-Independence cities? How have the post-Independence planner, governors and residents in their turn attempted to rein-scribe their cities with symbols of their Independence and nationalism? The rest of the course considers these themes arising from postcolonial concerns with the city, including nationalism, migration and globalization. With regard to all of these themes, we discuss their impact on the shaping of the city and the experience of the city, with specific examples from the readings and with reference to films viewed in class.

URBAN GOVERNANCE, POLITICS & POLICY

Course Director: Prof. Jeffrey Squire

The course examines urban issues currently in play in Canadian cities. Themes may include forces shaping the postindustrial city, urban planning in the multicultural city, the redevelopment of brownfield sites, gentrification in city downtowns, environmental dilemmas of suburban sprawl, the impacts of immigration on cities, the role of the arts and culture industries in cities today or other topics that are current in the weeks that the course meets. Considerable time is given to small-group and class discussion.

CITIES AS NEIGHBOURHOODS AND COMMUNITIES

The course considers local areas within urban regions and the people and processes that create and alter them. Different meanings of the concepts “community” and “neighborhood” are explored. Other topics addressed include the relationship between urban planning and local urban areas, designing community, and issues of inclusion and exclusion in urban neighborhoods. Students explore the ideas and issues raised in the course by way of case-study investigations of a variety of Toronto-area neighborhoods.

HIP HOP AND THE CITY

Explores urban space and urban issues through the lens of hip-hop culture. Topics include public space and the arts, race and identity, gender and sexuality, crime and policing, and globalization and the global city. Traces the origins of hip hop in the U.S. while using Toronto as a laboratory to understand the relationship between hip hop and Canadian urbanism.

TORONTO URBAN REGION

Course Director: Prof. Jeffrey Squire

The autumn-term course examines the older inner zone of Toronto, focusing on processes of growth and change – in the more distant past, more recently and today – that have led to the urban communities we now find in this part of town. Its main elements are a series of lectures, weekly class discussions and two walks through neighbourhoods in and around the city’s downtown. Each student is responsible for exploring a particular site in or around downtown, reporting back to small class groups about what they are learning about the site and writing a term paper about some feature of the site. The course is oriented to students who are members of the Urban Studies Program and would like to do a close study

of inner Toronto and to students from outside the program who would like to try their hand at an urban fieldwork project in a study of the city in which we experience our everyday lives.

HOUSING POLICY AND INCOME SECURITY POLICIES

It has been often stated that Canadians are among the best housed people in the world. Yet, it is also said that Canada has been in a continuous housing crisis for most of the twentieth century. We will examine this apparent contradiction in the context of the provision and consumption of housing. The course is divided into three major sections. In the first section we provide a contextual framework for policy evaluation by exploring the attributes of housing, housing markets and submarkets, housing need and demand, housing supply and finance, and the justification for government intervention in the housing market. In the second section, housing programs in Canada over the postwar period are surveyed and placed in the context of the evolving welfare state. Emphasis will be given to three major tenures: home ownership, private rental, and social and public housing. Several housing programs will be examined as case studies to see whose interests are served. In the third section we will consider a number of contemporary policy issues, especially concerning households who have difficulty accessing market housing. Examples of the latter include the homeless, women, immigrants and the elderly.

URBAN FIELD EXPERIENCE

Course Director: Prof. Teresa Abbruzzese

This course involves students in work with an organization engaged in some aspect of urban development or administration. Students commit one day a week (or the equivalent) to projects defined by a public or private agency in or near Toronto. Each student's work is supervised by a staff member of the agency and is monitored by the course director. This project should yield a product that both meets the agency's requirements and is suitable for academic credit. Details of each student's responsibilities will be arranged before the beginning of the academic year among the three parties involved: the student, the agency supervisor and the course director. Students who wish to enroll in this course must file an application form available from the Urban Studies Program Assistant and a resumé, and will be interviewed by the Urban Studies coordinator. Students must be at the fourth-year Honours level. Urban Studies Program majors are given priority.

Prerequisite: Permission of the course director (Starting 2017-18: AP/SOSC 3715 3.0)

READING LANDSCAPES THROUGH TIME

Landscape is a concept fundamental to geography, and this course discusses approaches to landscape through the lens of cultural and historical geography. Since landscape is an ambiguous concept, the course commences with a review of how the word has been used in twentieth-century geographical and historical research as well as how the landscape “way of seeing/observing” has manifested itself in Western societies throughout the modern period. Material, ideological and symbolic approaches to the study or “reading” of historical landscapes will be explored throughout the course, using case studies for illustration. Topics include the meaning of “landscape” in the early modern period, gentrified landscapes and class relations, colonial and postcolonial landscapes, modernist and post-modernist landscapes, literary landscapes, and immigrant-ethnic landscapes. The focus is broadly international, drawing upon research in Canada, the United States, England, Ireland, Asia and West Africa.

ADVANCED URBAN GEOGRAPHY

This course addresses significant contemporary urban issues that frame geographic understandings of metropolitan change in the twenty-first century. Attention is directed towards understanding how cities are produced, consumed, and theorized as complex social, economic, ecological, and political systems. Case studies are drawn from Canada and other More Economically Developed and Less Economically Developed countries. Through lectures, discussion, and assignments students are encouraged to challenge geographical interpretations of the urban world, and to think critically about cities as products of capital investment, as collective public goods, and as socio-cultural spaces.

ABORIGINAL SPACE AND THE CITY: NORTH AMERICAN URBANIZATION AND ABORIGINAL PEOPLE, 1890-1980

The interdisciplinary course explores the historical construction of Aboriginal space in Canada and US, and its relationship to cities. It does so as a cross-border study, examining this process in both Canada and the US, thereby viewing the border as part of this colonial mapping of space in North America. Canada and the United States are predominantly urban nations and have been since the early part of the century. In contrast, Aboriginal people have remained predominantly rural, tied to reservation lands. This course explores the way in which this difference was imagined, as well as the impact this spatial arrangement had on Aboriginal economies, politics, and identity. It also draws attention to the various ways in which Aboriginal people have responded to this process. An interdisciplinary course, it draws on Geography, History and Native Studies, among others.

PLANNING SUBURBS

From garden suburbs to post-war inner- and outer-suburbs, from New Urbanist communities to edge cities, technoburbs, and exurbs, this course critically considers the planning of suburban built form and the suburbanization process in historical perspective. Consideration is given to the mechanisms and the challenges of managing suburban growth, and to the complex socio-cultural geographies and values that shape the suburbs and the suburban way of life. Attention is directed to issues of gender, racialized

poverty, unemployment, infrastructural inadequacy, sprawl, and sustainability, and an effort is made to envision alternative futures.

VISUAL ARTS, ARCHITECTURE AND DESIGN

Critical Issues in Studio 2 is intended to further expand students' awareness of critical debates in contemporary art practice. It explores how artists contextualize their own work in relation to key areas of contemporary thought. This course explores the many intersections between art, design and architectural practices in both modern and postmodernity. It examines the evolution of the three areas as mutually informative; many artists, designers and architects have borrowed and transformed strategies from each other in order to engender new ways of seeing and living. Key movements and figures that have contributed to these fertile and creative exchanges are discussed against major tenets of modern and postmodern thought.

INVENTING THE METROPOLIS

This course explores the Metropolis thematically, taking into consideration its roots in industrialization and the impact of new technologies, utopic visions, and modernist notions that eventually shape contemporary urban issues. Significant discussion centers on modes of representing the city, particularly through photography, architecture and cinema. Compelling social issues are often configured around meanings of nationhood, identity and place of the individual in the city. Important urban centers such as Paris, London, New York as well as smaller city configurations such as Toronto, Montreal, Florence, Los Angeles, form the sites of our enquiries. Sessions are animated with critical discussions about identity politics, urban reform, alterity, representation and desire, utopian visions of the ideal city, concepts of private and public space, in order to develop a nuanced understanding about the ongoing fascination with urban space.
